Dec 2018	295	183	

<p>(28 days)</p>	<p>The number of times our Website has been accessed</p>	<p>a person who visits a site at least once within the reporting period. Each visitor to the site is only counted once during the reporting period, so if the same IP address accesses the site the site many times, it still only counts as one visitor. Special measures are taken by analytical programs to filter out visits that are not human, such as visits from spiders, crawlers & other bots.</p>	<p>A page view (PV) is a Web analytics term that refers to each time a Web page is successfully loaded onto a user's Web browser. Every time a Web page is viewed in a browser, the site's analytical software will increase the total page view count by one.</p>
